2022 PRODUCT CATALOGUE

2023 TARGET

The 2023 Targets apply to all packaging that is made, used and sold in Australia and requires a complete and systemic change to the way we create, collect and recover our product packaging.

The 2023 Targets are also an important step on Australia's journey towards a circular economy for packaging.

CIRCULAR ECONOMY

In a society where we are constantly on the move, convenience plays a vital role in the choices we make and the waste we produce. We aim to reduce the amount of single-use plastic waste by providing an eco-safe alternative range of recyclable, compostable, biodegradable, and sustainably sourced premium food packaging.

Only together we can make a difference but we all have our role to play and so, Equosafe begins it's first steps towards environmental sustainability.

ABOUT US

couting.

From humble beginings in the South East of Melbourne, Equosafe has grown it's range and reach all across Melbourne with 40 plus SKU's and

Equosafe aim's to reduce the amount of plastic waste by providing an eco-friendly alternative range of biodegradable, home compostable, and sustainably sourced premium products.

WE OFFER CUSTOM BRANDING

We're about more than just sustainable food packaging. Our in house graphic designers can create, develop and expand on your new or existing brand identity.

From logos, menu's, business cards, food packaging and more, our range of personalised in house services can take your brand from an idea, to conceptual development, right up to finalised print.
