## 2023 TARGET

The 2023 Targets apply to all packaging that is made, used and sold in Australia and requires a complete and systemic change to the way we create, collect and recover our product packaging.

The 2023 Targets are also an important step on Australia's journey towards a circular economy for packaging.

## CIRCULAR ECONOMY

In a society where we are constantly on the move, convenience plays a vital role in the choices we make and the waste we produce. We aim to reduce the amount of single-use plastic waste by providing an eco-safe alternative range of recyclable, compostable, biodegradable, and sustainably sourced premium food packaging.

Only together we can make a difference but we all have our role to play and so, Equosafe begins it's first steps towards environmental sustainability.

## ABOUT US

From humble beginnings in the South East of Melbourne, Equosafe has grown it's range and reach all across Melbourne with 40 plus SKU's and counting.

Equosafe aim's to reduce the amount of plastic waste by providing an eco-friendly alternative range of biodegradable, home compostable, and sustainably sourced premium products.
